**Academic Year: 2019-20**

Academic Year: 2019-2020

Name of the event: *Workshop on CNC Programming*

Date of the event: 2<sup>nd</sup> Sep to 9<sup>th</sup> Sep 2019

Name of the coordinator: D. Divya,

Asst Professor, Dept of ME

### Description:

- ❖ It is hereby informed that the Department of ME is Conducting CNC Programming training for IV B. Tech students (ME) in collaboration with the training and placement cell of MIC College of Technology, Kanchikacherla, conducted the CNC Programming workshop on Developing the understanding of the process of CNC machining process is the key to the course. As an engineer when a university graduate lands a job in the industry, he/she will come across these machines, especially in manufacturing e.g.: Automobile/Motorcycle Industry, Innovative Technologies Industry, Research and Development Industry and Manufacturing Machine Parts Industry, etc.
- ❖ Today's manufacturing utilizes innovative technologies, including sophisticated Computer numerical control (CNC), computer-aided manufacturing (CAM) software and specialty industry materials to develop and build the products of tomorrow.
- ❖ Students will be walked through all aspects of CNC machining, how to import a CAD model into CAM software, how to get it ready for machining and how to apply machining techniques to machine that part. At the end, students will spend some time on the machine learning how to machine a part on a CNC milling machining center. This last step is critical to put together pieces of the puzzle, so that one can understand the whole process.

Katchikacherla - 521180, Krishna Dist. A.P, India

Phone : 08678 - 273535, 273623, Fax: 08678 - 273569

e-mail: dvrsmic@mictach.ac.in, Website: www.mictach.ac.in

- ❖ Students will be applying machining techniques in the virtual world and then apply and see how a virtual object comes into reality on a CNC machine.
- ❖ The course will enable students to understand the whole process of CNC machining so that they are aware and have knowledge of the process, and it doesn't take them by surprise when they see these machines in the industry. Having prior knowledge and understanding will enable them to take part in decision-making as well. This basic course is designed around the idea of knowledge, awareness and hands-on training.
- ❖ Eight days of training include Forenoon and Afternoon Sessions, which include hands-on experience.
- ❖ This workshop is beneficial to 39 students who are trained during these 8 days of the workshop.

Target Audience: IV B. Tech – ME students.

## Feedback Form

Course Name: CNC programming

Duration of the Course: 02/09/2019 — 09/09/2019

(Please do not write your name. You are free to respond objectively)

1. Please give your comments on the usefulness of the Workshop/guest Lecture/Seminar.

The place of the space of the workshop is good.

The lecture gives seminar also excellent & very easy to understand

2. Please give your comments on the process/methods during the program.

In CNC programming, the codes are simple & useful manner to the less skilled operator also.

3. What input areas were most useful to you ("which you have learnt/experienced during the programme)?

The filing & drilling & enlarging the workpiece is that I experienced more than the other.

4. In what input areas would you prefer to have further training?

Yes, the input areas I prefer to further of my training & to my journal also.

5. Further Comments (if any)

This CNC programming is useful to our future.

I think our campus will conduct more programme like this.

Thank you.

Academic Year: 2019-2020

Name of the event: **Workshop on CATIA**

Date of the event: 17<sup>th</sup>Sep to 21<sup>st</sup> Sep 2019

Name of the coordinator: Mrs. K. Supriya

Assistant Professor

### Description:

- ❖ The Department of ME is Conducting CATIA training for IV B. Tech students (ME) in collaboration with the training and placement cell of MIC College of Technology, Kanchikacherla, conducted the CATIA workshop on Create and Manage Complete Mechanical Project, Including Advanced Surface Design etc.
- ❖ Five days of training includes Forenoon and Afternoon Sessions, which includes hands-on experience.
- ❖ Create and manage the design of sophisticated mechanical projects, including advanced surface design
- ❖ Real-time collaboration: work in parallel and exchange through 3DEXPERIENCE Platform
- ❖ Conceptual design: use 2D or 3D techniques to create a workable concept for detailed design
- ❖ Assembly & kinematics: Design and animate complex kinematic mechanisms
- ❖ Detailed Design: Accelerate the detailed design of the rough parts and check the feasibility to ensure the manufacturing requirements
- ❖ Unified user interface: Accelerate your design with natural manipulations and contextual interactions

- ❖ **Product review:** Detect and track interferences, check the weight distribution, and analyze the digital mock-up with relevant engineering data
- ❖ **Knowledge design automation:** Capitalize on your assets, capture modeling methodologies, and reuse associative templates
- ❖ **Associative Drawings:** Generate associative layouts with multi-views, dimensions, and associated bill of materials
- ❖ **Advanced Surface Design:** Enrich mechanical products with sophisticated and high-quality shapes
- ❖ This workshop is beneficial to 41 students who are trained during these 5 days of the workshop.

Target Audience: IV B. Tech – ME students.

Name of the event: **Workshop on SOLID EDGE**

Date of the event: 21<sup>st</sup> Sep to 28<sup>th</sup> Sep 2019

Name of the coordinator: R. Ranjith Kumar,

Associate professor, Department of ME

### Description:

- ❖ The Department of Mechanical Engineering is Conducting Solid Edge training for IV B. Tech students (ME) in collaboration with the training and placement cell of MIC College of Technology, Kanchikacherla, conducted the Solid Edge workshop on Essential training for NEW users to Solid Edge. Covers all of the basic concepts of Solid Edge from navigating the interface, different environments, profile creation, part modelling, assembly modelling, drawing creation and file management. The course covers both synchronous technology tools and traditional, history-based, parametric design tools
- ❖ Eight days of training includes Forenoon and Afternoon Sessions, which includes hands-on experience.
- ❖ Explore the Solid Edge interface and cover how to navigate the different environments. Also learn about the requirements of a feature-based modelling system and how to plan the design process.
- ❖ Learn how to create and manipulate part models using all the base and profile driven feature types. This includes all extent options and how open profiles in Solid Edge can simplify feature creation. Also cover the use of non-profile-based treatment features such as round, blend, chamfer, draft, as well as how to reuse geometry and features through the use of patterning and mirror commands.

- ❖ Learn how to construct 2D drawings from 3D parts, sheet metal parts and assemblies all view types are covered including section, broken section and details views. Then create fully detailed drawings using Solid Edge's comprehensive dimension and annotation tools.
- ❖ Learn how to build assemblies using intelligent relationships and mate conditions. Also, learn how to manipulate assemblies as well as control their display through the use of display configurations, exploded views and more.
- ❖ This workshop is beneficial to 58 students who are trained during these 8 days of the workshop.

Target Audience: IV B. Tech – ME students.

## Feedback Form

Course Name: SOLID EDGE

Duration of the Course: 21-9-2019 TO 28-9-2019

*(Please do not write your name. You are free to respond objectively)*

1. Please give your comments on the usefulness of the Workshop/guest Lecture/Seminar.

The workshop useful for gaining the knowledge and useful for placements

2. Please give your comments on the process/methods during the program.

Teaching is good while the process is going on it is useful for a less skill operatibus.

3. What input areas were most useful to you ("which you have learnt/experienced during the programme)?

we are expecting present modeling and 3D solids.

4. In what input areas would you prefer to have further training?

we to expecting deslault systems.

5. Further Comments (if any)

very nice session

Academic Year: 2019-2020

Name of the event: *Workshop on AutoCAD*

Date of the event: 11<sup>th</sup> Nov to 16<sup>th</sup> Nov 2019

Name of the coordinator: Mr. A. Naga Pavan Kumar

### Description:

- ❖ The Department of ME is Conducting AutoCAD training for IV B. Tech students (ME) in collaboration with the training and placement cell of MIC College of Technology, Kanchikacherla, conducted the AutoCAD workshop on drawing sketches with the help of 2D and 3D tools on computer screens. This course helps students who are engaging in the study of architecture, engineering and mechanics, etc.
- ❖ Six days of training include Forenoon and Afternoon Sessions, which include hands-on experience.
- ❖ Students will learn about the powerful extension of standard AutoCAD design and 2-dimensional designs for manufacturing, engineering, and mechanical design sectors. The course CAD mechanical AutoCAD is helpful for companies that are engaged in digital prototyping workflows.
- ❖ AutoCAD interface has applications like the ribbon, the menu browser, steering wheels, info centre, tool palettes, the command prompt, viewports, status bar, slow motion, view cube, quick access toolbar, and action recorder. These commands and the user interface elements are used for drafting and editing tasks in AutoCAD.
- ❖ Students will learn about the concept of mechanical drawing, which is also called drafting. Mechanical drawing is a method used for representing a 3D object on a 2D piece of drawing paper. There are two types of mechanical drawings such as pictorial and orthographic.

## Feedback Form

Course Name: *Auto CAD*

Duration of the Course: *11-11-2019 to 16-11-2019*

*(Please do not write your name. You are free to respond objectively)*

1. Please give your comments on the usefulness of the Workshop/guest Lecture/Seminar.

*To create detailed 2D and 3D drawings, plans, and models for Automobile Products.*

2. Please give your comments on the process/methods during the program.

*In the training session, the trainers are well knowledgeable and provided useful information, the way of training methods are good.*

3. What input areas were most useful to you ("which you have learnt/experienced during the programme)?

*Mechanical diagrams, Isometric views and Geometry & Dimensional Constraints are very interesting and useful to me.*

4. In what input areas would you prefer to have further training?

*I would like to conduct different mechanical softwares from the college, which is Dassault Falcon.*

5. Further Comments (if any)

*Thank you for providing skillful training.*
