Dear Sir,

Sub: Request to extend your Cooperation and consent for **Community Service Project** as a part of Curriculum - as per APSCHE Guidelines -Regarding.

Greetings from DVR & Dr HS MIC College of Technology! Established in 2002, MIC College of Technology is affiliated to JNTUK, Kakinada and is recognized by AICTE. NBA accreditation to 3 branches and 'A' grade by NAAC stand as a true testimony to the Quality Policy of the institute. As per APSCHE Guidelines all the Third year B.TECH students of Electrical and Electronics Engineering (MIC 20) have to undergo industrial Community Service Project in your school titled as 'AWARENESS PROGRAM ON ELECTRICAL SAFETY' & 'AWARENESS PROGRAM ON CARRIER GUIDELINES'.

So, your kind co-operation in this regard is highly solicited and appreciated.

Thanking you.

Note: Student details enclosed :

1. Shaik Jareena Begum(21H75A0216);
2. Mohammad khajamoinuddin shaik (21H75A0221);
3. Vedantam Sai Krishna (21H75A0246);

Acknowledgements

We wish to express our sincere gratitude to our esteemed guide Mr. M. Tharun for his valuable guidance, encouragement and gracious support throughout the work. His valuable suggestions, effusive co-ordination and encouraging interactions were a great driving force for us to carry out this Community Service Project.

We are grateful to Dr. P. Pradeep Head of the Electrical and Electronics Engineering Department, for his support and permitting us to take up our project work and to complete the project successfully.

We express our sincere thanks to Dr. K. Srinivas Principal, DVR & Dr. HS MIC College of Technology, Kanchikacherla.

We are also thankful to _____ official of the community, who gives support to us during this work and others who assisted us in this community project work.

Instructions to Students for Community Service Project

Please read the detailed Guidelines on Community Service Project hosted on the website of AP State Council of Higher Education <https://apsche.ap.gov.in>

Link: <https://apsche.ap.gov.in/Pdf/Guidelines%20for%20the%20OJT%20Internship%20Community%20Service%20Project.pdf>

1. It is mandatory for all the students to complete 180 hours of Community Service Project as a part of the internship/on the job training.
2. Consider yourself a committed volunteer in the community, you work with.
3. Every student should identify the village/community/habitation for Community Service Project (CSP) in consultation with the College Principal/the authorized person nominated by the Principal.
4. Report to the community/habitation as per the schedule given by the College. You must make your own arrangements for transportation to reach the community/habitation.
5. You will be assigned a Faculty Guide from your College. He/She will be creating a WhatsApp group with your fellow volunteers. Post your daily activity done and/or any difficulty you encounter during the programme.
6. You should maintain punctuality in attending the CSP. Daily attendance is compulsory.
7. You are expected to learn about the community/habitation and their problems.
8. Know the leaders and the officials of the community/habitation.
9. While in the project, always wear your College Identity Card.
10. If your College has a prescribed dress as uniform, wear the uniform daily.
11. Identify at least five learning objectives in consultation with your Faculty Guide. These learning objectives can address:
 - Information about the community, including the realities and problems of the society.
 - Need for creating awareness on socially relevant aspects/programs.
 - Acquiring specific Life Skills.
 - Learning areas of application of knowledge and technologies related to your discipline.
 - Identifying developmental needs of the community/habitation.

12. Practice professional communication skills with team members, and with the leaders and officials of the community. This includes expressing thoughts and ideas effectively through oral, written, and non-verbal communication, and utilizing listening skills.
13. Be regular in filling up your Program Book. It shall be filled up in your own handwriting. Add additional sheets wherever necessary.
14. At the end of Community Service Project, you shall be evaluated by the person in-charge of the community/habitation to whom you report to.
15. There shall also be an evaluation at the end of the community service by the Faculty Guide and the Principal.
16. Do not indulge in any political activities.
17. Ensure that you do not cause any disturbance to the inhabitants or households during your interaction or collection of data.
18. Be cordial but not too intimate with the people you come across during your service activities.
19. You should understand that during this activity, you are the ambassador of your College, and your behavior during the community service programme is of utmost importance.
20. If you are involved in any discipline related issues, you will be withdrawn from the programme immediately and disciplinary action shall be initiated.
21. Do not forget to keep up your family pride and prestige of your College.
22. Remember that you are rendering valuable service to the society and your role in the community development will become part of the history of the community.

CHAPTER-1
Executive Summary

This report is about my internship program at S.M.A KHUDDUS M.C. HIGH SCHOOL. In this comprehensive report, I have discussed about very major aspects of "Electrical Safety & Career Guidance"; in the school environment during my internship program.

In this report you will find the detail about School from its incorporation to the current position. Along with it, the location and present strength of students and overall view of school.

During my internship program; I mainly worked in Electrical Safety & Career Guidance for the students benefits. All the areas for proper career development are discussed in detail and clarified doubts. Similarly; discussed all the concepts (Basic) of Electricity and created awareness among Electrical Safety.

This internship report covers many important aspects which are basically related with Electrical Safety & Career Guidance and maintained an weekly report with Attendance Logsheet.

In the End Outcome's and Recommendation's & Conclusion section's consists of all the possible outcome's we get from the students and faculty; during our internship program.

This report also contains Page No: 09 weekly reports and weekly attendance sheet with signatures and stamps from the school.

CHAPTER-2
Overview of the Community

S.M.A. KHUDDUS MC HIGH SCHOOL; it is situated in Bhavanipuram & it was established in 1974 and it is managed by Local body. It is located in urban area; it is located in Vijayawada (Urban) block of Krishna district of Andhra Pradesh.

At earlier stages the school consists of Grades from 1 to 5 only later S.M.A.K. MC HIGH SCHOOL from 6 to 10th has been started with Urdu, ^{English} medium, under Government of AP.

The school is co-educational and it does not have any attached primary school section. The school is approachable by all the weather conditions.

At present in S.M.A. Khuddus MC high school from 6th to 10th total 200 students are available. The staff members are at a total of 11 members; Among them six members are ladies staff and remaining 5 are gents.

All the classrooms are good and for some classrooms we can observe that they are digital classrooms. for Headmaster & staff have separate rooms. Also have separate toilet & washrooms for (girls & boys) students.

The school does not have playground; Library; has no computerised Learning Lab's. Now the S.M.A. Khuddus MC High School is consists both English & Urdu mediums from 6th to 10th. And this is applicable for providing mid-day meal's scheme....

CHAPTER-3
Community Service Part

The main problem of now-a-days is lack of knowledge about electrical safety and Career Guidance.

In India due to lack of awareness 30 people are being killed by electrical accidents every day. Similarly, the statistics tells us that the over 400 electrocutions & over 4000 non-fatal injuries occurring in United States; the common reason for all the circumstances is lack of awareness about electrical safety.

You cannot smell, hear, or see electricity; so making sure you have the right system in place to manage hazardous energy. Electrical safety is a general practice of workers who are exposed to handling and maintaining electrically powered equipment. And it is also applicable for household. Keeping your home safe for both yourself and your children is of paramount importance.

In Career Basis also; it is important to come up with your career planning as it gives you the much-needed direction and makes it clear where you see yourself in the future. It makes you aware of your strengths and weakness and the skills and knowledge that are required to achieve your goals in future.

A large proportion of our life spent in achieving our career goals, thus it is very importance to make sure that right steps were taken & correct career guidance is done which gives you career and your life.....

WEEKLY REPORT

WEEK - 1 (From Dt. 30/7/22 to Dt. 5/8/22...)

Objective of the Activity Done: Introduction & Basics about Electricity

Detailed Report:

Finally after discussing whole day we have finally selected topics and Community. Today 30/7/2022 we started our journey for Community Service Project (CSP).

After that we went to school on next day dated and had a conversation with headmaster of school and asked permission, later on next day they granted permission and allotted IX & X classes.

We have presented an rough presentation about our topics Electrical Safety & Career Guidance and Community Service program.

INTRODUCTION :-

On 30/7/2022 we started our program with students. At first we took IXth class of both medium's (Urdu & English) and shared our thoughts on this program. We have given introduction about ourselves & college and describe's basic's about Electricity.

Similarly; we took class X and describe basics of Electricity as follows. At the end of week we covered:-

⇒ In this lecture we covered:

- i, Basic details of Electricity. (Introduction)
- ii, Importance of Electrical Safety Awareness.

Electricity:-

Electrical energy is of much importance to the world. Notwithstanding the huge benefits of electric energy; the lack of adherence to basic rules associated with electricity use has caused many adverse effects including electric shocks and electric fires, additionally insufficient use of electric energy has dire financial consequences.

Therefore, electrical energy conservation and electrical safety awareness is of utmost importance in all areas of electricity usage, residential, educational, commercial & industrial.

Electricity is everywhere, so reliable and useful these days that it is often taken for granted, and it is somewhat shocking how little is actually understood about its properties by the general public, another reason why electrical safety training is important.

You cannot smell, hear or see electricity, so making sure you have the right systems in place to manage this hazardous energy is critical to the well being of your family & friends.

Electrical safety is important because of hazards.

However, the control measure that prevent the hazards requires careful management, attention. Thus, Electrical Safety Awareness is much most important....

WEEKLY REPORT

WEEK - 2 (From Dt. 8/8/22 to Dt. 13/8/22)

Objective of the Activity Done: Electrical Hazards; safety measures & tips

Detailed Report:

In this second week of our program we continued about Electricity in more detail so that students could understand how to be better among Electrical Safety.

For the we went with topics such as Electrical Hazards; Electrical Safety measures and tips to avoid electrical accidents.

Electrical Safety :-

Electricity can kill or severely injure people and cause damage to property. However, you can take simple precautions when working with or near electricity and electrical equipment to significantly reduce the risk of injury to you; your family and others around you.

→ Now we are going to discuss about Hazards due to Electricity.

What are the Hazards?

An Electrical Hazard can be defined as a serious workplace hazard that exposes to burns, electrocutions, shock or flash / arc blast, fire or explosion. By identifying these hazards and understanding how they happen, we can take steps to protect ourselves.

→ Types of hazards to be aware of :-

- i, Contact with Energized Source.
- ii, Contact with power lines
- iii, Improper use of extension and flexible cords etc.

→ Cause of Electrical Hazards :-

- faulty or damaged wiring or equipment.
- Loose Connections.
- Use of poor quality fittings etc

→ Electrical Safety tips for avoiding Electrical Accidents :-

1. Before plugging in a device, examine both the device and its cord for damage. Look for corroded, loose or bent plugs.
2. When removing plugs from outlets, pull on the plug, not the cord.
3. Don't overload circuits. Use a ground fault circuit interrupter (GFCI)

Among all of these tips awareness about Electrical safety is more important without an proper knowledge you can do anything. So, it is basic and necessary to be educated about Electrical Safety.....

Additionally we discussed about proper cordling such as making sure all cords are plugged away safely out away from the children and pets. This is very most important to prevent accidents because some severe cases leads to death in some extreme cases.

Later some students asked doubts and some students often underestimate awareness of electrical safety. For them we guided effectively about severe dangers of electrical; safety measures should be taken etc.

We concluded this week session by conducting a feed-back session and clearing more doubts about the topic Electrical Safety we discussed.

→ We closed the session by simple introduction of our next week session i.e. Career Guidance....

Final
Of
Electrical Safety

WEEKLY REPORT

WEEK - 3 (From Dt. 9/1/22 to Dt. 16/1/22)

Objective of the Activity Done: About ~~Starting~~ Career Guidance

Detailed Report:

This is the 3rd week of our community service project. In this week we mainly focused on "Career Guidance".

Understanding career guidance and exploring potential across career options. We discussed;

- the importance of Research

- Goal Setting

- Getting / approaching network

in order to fulfil our life goals.

Importance :-

It is important to come up with your career planning as it gives you the much needed direction and makes it clear there where you see yourself in the future. It makes you aware of your Strength & Weakness; the Skills and knowledge that are required to achieve your goals in the future.

"Now the big question among us is -"

What is Career?

Simply: An occupation undertaken for a significant period of a person's life and with opportunities for progress.

Career is more (or) less related to any work, but specifically speaking; it is expected to see a momentum in upwards (development).

→ To build a successful career we need to be pre-planned about our careers, for that we have to plan our studies

- 1) What to study
 - 2) Where to study
 - 3) When to study
 - 4) Why to study
- } ??

For getting our dream's true we need to fulfill the above 4 queries. Now we are here to guide you toward fulfilment of your queries and get a step forward's towards success.

Now the 1st most question ^{among} all of you is
What After 10th/SSC — ?

Choosing a stream is one of most difficult decisions that a student has to make after completing class 10th. It is a crucial decision; everything happens to you depends on (or) determined by it.

WEEKLY REPORT

WEEK - 4 (From Dt. 17/1/23... to Dt. 21/1/23...)

Objective of the Activity Done: ^{goals} Setting & Implimentation to be success

Detailed Report:

The last week of our program. As we seen in last session. We are at "How to choose (or) What to select/prefer after 10th."

Let us take a look of ppt presentation made our team about Career Guidance for you students in all the stream's which are available for you after 10th (or) SSC.

power point presentation →

from ppt we explained each & every stream which can be obtained after 10th in all stream's such as Arts, commerce, Science and also occasical course like Fashion designing; Textile technology; DIT - etc. We have also covered undergraduate level i.e. Diploma courses in Engineering throug polytechnic's. - etc

In this session we have discussed various academic paths available for 10th students.

We explored topics such as selecting a course according to their goals and also college's which they have prefer 1st to get a step forward for their goals

We emphasised them towards improving skills which will be add weight for their growth towards success, not only as a way of getting job we have motivated them towards startup's & high profile jobs like IAS, IPS -- etc.

They students get well motivated; at last we conducted an doubts clarifying session in which most of the students talked with us and cleared doubts among their respective field in goals.

WE HOPE THEY CAN BUILD THEIR GOALS

TRY TO ACHIEVE THEM

And finally from the above all the discussion to check the students willing we asked them individually about their goals & they replied very well. With a feedback conducted by H.M Sir at last we ended the session.

CAREER GUIDANCE

END

CHAPTER - IV

SNO.	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
<u>Week's</u>			
Week-1	* Introduction about college & Self & about CSP * Basic details of Electricity	→ They listened introduction clearly. → Students are getting more interested to get more knowledge.	 HEAD MASTER S. M. A. KHUDDUS M. C. HIGH SCHOOL BHAVANIPURAM, VILAYANADA - 12
Week-2	* Electrical conversion & generation types * Electrical Safety measures	→ They listened carefully & get an idea how electricity is generated & its safety measures	
Week-2	* What is Hazard & how they occur's * How to be protected from hazard's tips & measures	→ In this week; as we completed basic of electricity. Now in this week, we have focused on safety from hazard's	
Week-3	* Introduction about what is career? How to achieve it? (Regarding all areas)	→ Students are very enthusiastic to share their future goals with us.	
Week-4	* Importance of career guidelines. * What next after 10 th ? * How to select a course after 10 th ?	→ They got an ideal of being pre-planned about their career.	
Week-4	* Setting goals & Implementation * proper guidance in all fields (Arts, science & Commerce) & occasional course's also.	→ They can set their goals; after all the session is completed. → They rapidly discussed about their doubts → They participated well throughout the program....!	

CHAPTER-5
Outcomes Description

After Completion of the program students got to know what exactly electricity is and how it is generated and the importance to save the electricity and they got aware of Electrical Hazards. They have a basic Idea on Electrical energy and its uses. We explained each Concept with Examples for better understanding

From this program the students got the Knowledge on the Utility of power Consumption and Safety Methods taken for Healthy Environment Condition. They clearly Understood the importance of Electricity and its usage.

We have motivated the students for their Career development. They came to know the Importance of Choosing the Right path for their future. After completion of career guidance session they have a clear vision of what to prefer after 10th. They clarified their doubts and came out from their confusion. They were well motivated and have a strong belief on their career development.

We are fully ^{Satisfied} on our program and we utilized the every opportunity given. We work hard on every aspect for giving our best. We are enjoyed & Thanks for giving this opportunity.

CHAPTER-6

Recommendations and Conclusions

We successfully ended the community service program with the great co-operation of students and school management. We are here by for thanks to our faculty incharge M. Tharun; Sir for his guidance. And each and every member of the community group have participated well and managed the successful community service program.

We concluded that, the students must follow's instructions given by the members; safety measures and guidelines properly. He guided them with proper instructions for electrical safety and usage of electric utilization. We have given some suggestions to students for their better future.

Recommendations that are suggested to students for the Electrical Safety.....

"Do the Earth a favour be a power of favour"

→ "Use it but Don't Abuse it"

Recommendations for career guidelines:-

"The best way to predict future is to CREAT it"

CHAPTER-7

Student Self-Evaluation for the Community Service Project

Student Name: MOHAMMAD. KHASAMUJNUDDIN SHAIK

Registration No: Q1H75A0222

Period of CSP: 4 - Weeks

Date of Evaluation: 21/01/2023

Please rate your performance in the following areas:

Rating Scale: Letter grade of CGPA calculation to be provided

1	Oral communication	1	2	3	4	5 ✓
2	Written communication	1	2	3	4 ✓	5
3	Proactiveness	1	2	3	4	5 ✓
4	Interaction ability with community	1	2	3	4	5 ✓
5	Positive Attitude	1	2	3	4	5 ✓
6	Self-confidence	1	2	3	4	5 ✓
7	Ability to learn	1	2	3	4	5 ✓
8	Work Plan and organization	1	2	3	4 ✓	5
9	Professionalism	1	2	3	4	5 ✓
10	Creativity	1	2	3	4 ✓	5
11	Quality of work done	1	2	3	4	5 ✓
12	Time Management	1	2	3	4 ✓	5
13	Understanding the Community	1	2	3	4	5 ✓
14	Achievement of Desired Outcomes	1	2	3	4	5 ✓
15	OVERALL PERFORMANCE	1	2	3	4	5 ✓

Instructions to Students for Community Service Project

Please read the detailed Guidelines on Community Service Project hosted on the website of AP State Council of Higher Education <https://apsche.ap.gov.in>

Link: <https://apsche.ap.gov.in/Pdf/Guidelines%20for%20the%20OJT%20Internship%20Community%20Service%20Project.pdf>

1. It is mandatory for all the students to complete 180 hours of Community Service Project as a part of the internship/on the job training.
2. Consider yourself a committed volunteer in the community, you work with.
3. Every student should identify the village/community/habitation for Community Service Project (CSP) in consultation with the College Principal/the authorized person nominated by the Principal.
4. Report to the community/habitation as per the schedule given by the College. You must make your own arrangements for transportation to reach the community/habitation.
5. You will be assigned a Faculty Guide from your College. He/She will be creating a WhatsApp group with your fellow volunteers. Post your daily activity done and/or any difficulty you encounter during the programme.
6. You should maintain punctuality in attending the CSP. Daily attendance is compulsory.
7. You are expected to learn about the community/habitation and their problems.
8. Know the leaders and the officials of the community/habitation.
9. While in the project, always wear your College Identity Card.
10. If your College has a prescribed dress as uniform, wear the uniform daily.
11. Identify at least five learning objectives in consultation with your Faculty Guide. These learning objectives can address:
 - Information about the community, including the realities and problems of the society.
 - Need for creating awareness on socially relevant aspects/programs.
 - Acquiring specific Life Skills.
 - Learning areas of application of knowledge and technologies related to your discipline.
 - Identifying developmental needs of the community/habitation.

12. Practice professional communication skills with team members, and with the leaders and officials of the community. This includes expressing thoughts and ideas effectively through oral, written, and non-verbal communication, and utilizing listening skills.
13. **Be regular in filling up your Program Book. It shall be filled up in your own handwriting. Add additional sheets wherever necessary.**
14. At the end of Community Service Project, you shall be evaluated by the person in-charge of the community/habitation to whom you report to.
15. There shall also be an evaluation at the end of the community service by the Faculty Guide and the Principal.
16. Do not indulge in any political activities.
17. Ensure that you do not cause any disturbance to the inhabitants or households during your interaction or collection of data.
18. Be cordial but not too intimate with the people you come across during your service activities.
19. You should understand that during this activity, you are the ambassador of your College, and your behavior during the community service programme is of utmost importance.
20. If you are involved in any discipline related issues, you will be withdrawn from the programme immediately and disciplinary action shall be initiated.
21. Do not forget to keep up your family pride and prestige of your College.
22. Remember that you are rendering valuable service to the society and your role in the community development will become part of the history of the community.

Acknowledgements

We wish to express our sincere gratitude to our esteemed guide K. Supriya for his valuable guidance, encouragement and gracious support throughout the work. His valuable suggestions, effusive co-ordination and encouraging interactions were a great driving force for us to carry out this Community Service Project.

We are grateful to Dr. P.V. Siva Reddy ^{Mechanical.} Head of the Engineering Department, for his support and permitting us to take up our project work and to complete the project successfully.

We express our sincere thanks to Dr. K. Srinivas Rao Principal, DVR & Dr. HS MIC College of Technology, Kanchikacherla.

We are also thankful to A. Soneela official of the community, who gives support to us during this work and others who assisted us in this community project work.

CHAPTER-1
Executive Summary

We have decided to go in a path to guide the students into a better career on mechanical Engineering. We thought of a moment to help a community of farmers on new farming methods and give them brief of using power tools and their working in modern farming. As we have started to visit schools for guidance of career to the students we had many students who were very important of into know about what they were to do by our guidance and path of career.

As we have visited many schools for our Community Service project to guide the students on their career. We have learned many things and thought them many things and even some of their teachers have helped us during our guidance to the students which us inspired

As we have moved to the farmer mechanization by power tools. We helped many farmers on learning modern farming methods and usage of power tools.

CHAPTER-2

Overview of the Community

our Community has many children who were about to enter into a life of education which starts their path for a good career in the future. They might want to become anything they want to be apart from being a mechanical Engineer we have helped them in the selection and path of their own. Depending upon their choice and we have managed to explain them. How a mechanical Engineering life would be apart from others with a temporary job of high salary they were truly intrigued into the subject and the application to their life.

our Community even has some of the small farmers who are poor in knowledge of the modern farming and tools that can be used for farming during heavy crops we gathered them together to a place and explained about the modern farming and about the power tools.

CHAPTER-3
Community Service Part

We have scheduled our Community Service on the basis of the students timings at the schools and the permissions give by the principal. we have scheduled it as one week is for the Career guidance to the students on mechanical Engineering and then other week as farmer mechanization by power tool in the former.

As we scheduled on our community service we started visiting schools and farms for guidance on both Career guidance and farm mechanization by power tools.

CHAPTER-4
ACTIVITY LOG FOR THE FIRST WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Career guidance of importance of mechanical engineering at various levels of life	Students were very interested in the path of mechanics	
Day - 2	Career guidance of importance of material Engineering at various levels of life.	Students were very interested in the path of mechanical	
Day - 3	Career guidance of importance of mechanical engineering	Students were very interested in the path of mechanical	
Day - 4	Career guidance of importance of mechanical engineering	Students were very interested in the path of mechanical	
Day - 5	Career guidance of importance of mechanical engineering.	Students were very interested in the path of mechanical	
Day - 6	Career guidance of importance of mechanical engineering.	Students were very interested in the path of mechanical	

WEEKLY REPORT

WEEK - 1 (From Dt. 30/12/22 to Dt. 5/1/23...)

Objective of the Activity Done:

Career guidance on importance of mechanical engineering.

Detailed Report:

On the detail discussion with the students on their career & the path they want to go in, we have successfully managed to make them learn and in their path of getting a great opportunity the students were very intrigued in their path of career to get a bright we even gave every one a clear information on the goals and ways to achieve them even though they are different from students (B) Engineering.

Many of the students were about the start their answer on being a mechanical Engineer as we have started on its importance in life.

ACTIVITY LOG FOR THE SECOND WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	farm mechanization by power tools	The workers and farmers were more interested in power tools.	
Day - 2	farm mechanization by power tools	The workers and farmers were more interested in power tools.	
Day - 3	farm mechanization by power tools	The workers and farmers were more interested in power tool.	
Day - 4	farm mechanization by power tools	The workers and farmers were more interested in power tool.	
Day - 5	farm mechanization by power tools	The workers and farmers were more interested in power tool.	
Day - 6	farm mechanization by power tools.	The workers and farmers were more interested in power tool.	

WEEKLY REPORT

WEEK - 2 (From Dt. 18.1.22 to Dt. 23.1.22)

Objective of the Activity Done: Farm mechanization by power tools

Detailed Report:

Many of the farmers in the locality we have visited were still using the methods that were used in 90's so we have made simpler changing with what they had and a little of scrap materials that were left.

They were involved in what we were about to do it the things we have collected and helped us to make what we were supposed to the outcomes of their little work and scrap.

We explained them about power tools and their functioning in the farming and how they make the work easy and efficient we gave them a clear idea on every power tool.

ACTIVITY LOG FOR THE THIRD WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Career guidance of importance of mechanical engineering	Students were very interested in the path of mechanical	
Day - 2	Career guidance of importance of mechanical engineering	Students were very interested in the path of mechanical	
Day - 3	Career guidance of importance of mechanical engineering	Students were very interested in the path of mechanical	
Day - 4	Career guidance of importance of mechanical engineering.	Students were very interested in the path of mechanical.	
Day - 5	Career guidance of importance of mechanical engineering	Students were very interested in the path of mechanical	
Day - 6	Career guidance of importance of mechanical engineering.	Students were very interested in the path of mechanical.	

WEEKLY REPORT

WEEK - 3 (From DI 21/1/23 to DI 25/1/23)

Objective of the Activity Done:

Detailed Report:

On the detail discussion with the students on their career and the path they want to go in we have intently managed to make them learn about the importance of B.tech in their lives and in their path of getting a great opportunities the students were very intrested in their path of career to get a bright future. we even gave everyone a clear information on the goals and ways to achieve them even though they are different from studies (B) Engineering.

ACTIVITY LOG FOR THE FORTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Farm mechanization by power tools	The workers and tenants were more interested in power tools	
Day - 2	Farm mechanization by power tools	The workers and tenants were interested in power tools.	
Day - 3	Farm mechanization by power tools	The workers and tenants were more interested in power tools	
Day - 4	Farm mechanization by power tools	The workers and tenants were more interested in power tools	
Day - 5	Farm mechanization by power tools	The workers and tenants were more interested in power tools	
Day - 6	Farm mechanization by power tools	The workers and tenants were more interested in power tools.	

WEEKLY REPORT

WEEK - 4 (From Dt. 14/1/23 to Dt. 23/1/23)

Objective of the Activity Done:

Detailed Report:

Many of the farmers in the locality we have visited were still using the methods that were used in 90's so we have made some simple changes with what they told to us and a little of scrap materials that were left. They were involved in what we were about to do with the things we have.

collect and helped us to make what we were trying and did exactly what we said. They were surprised to the outcome of their little work & scrap.

ACTIVITY LOG FOR THE FIFTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Career guidance on mechanical Engineering	Students were very interested in path of mechanics	S. S. Prasad HEAD MASTER Z P H SCHOOL KANCHIKACHERLA-52118
Day - 2	Career guidance on Importance of mechanical Engineering	Students were very interested in path of mechanics	S. S. Prasad HEAD MASTER Z P H SCHOOL KANCHIKACHERLA-52118
Day - 3	Career guidance on importance of mechanical engineering	Students were very interested in path of mechanics	S. S. Prasad HEAD MASTER Z P H SCHOOL KANCHIKACHERLA-52118
Day - 4	Career guidance on importance of mechanical engineering	Students were very interested in the path of mechanics	S. S. Prasad HEAD MASTER Z P H SCHOOL KANCHIKACHERLA-52118
Day - 5	Farm mechanization by Power tool	Students were very interested in the path of mechanics	E. Krishna Kumar Panchayat Secretary GRAMA PANCHAYAT KONDURU
Day - 6	Farm mechanization by power tool.	Students were very interested in the path of mechanics	E. Krishna Kumar Panchayat Secretary GRAMA PANCHAYAT KONDURU

WEEKLY REPORT

WEEK - 5 (From Dt 19.11.23 to Dt 25.11.23)

Objective of the Activity Done:

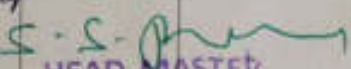

Carrier guidance for students.

Detailed Report:

on the detail discussion with the student on their carrier and the path they want to go in we have succuful managed to make them learn about impoitance of B-Tech in their lives and in their path of carrier to make a get a bright future. we Even gave everyone a clear information on the goals and ways to achieve them even though they different from student (a) Engineering.

Many of the student's were very find of the Engineering college and the life.

ACTIVITY LOG FOR THE SIXTH WEEK

Day & Date	Brief description of the daily activity	Learning Outcome	Person In-Charge Signature
Day - 1	Career guidance on Importance of mechanical Engineering	Students were very interested in the path of mechanics	 HEAD MASTER Z P H SCHOOL KANCHIKACHERLA-571111
Day - 2	Career guidance on Importance of Mechanical Engineering	Students were very interested in the path of mechanics	 HEAD MASTER Z P H SCHOOL KANCHIKACHERLA-571111
Day - 3	Career guidance on Importance of mechanical engineering	Students were very interested in the path of mechanics	 HEAD MASTER Z P H SCHOOL KANCHIKACHERLA-571111
Day - 4	Career guidance on Importance of mechanical engineering	Students were very interested in the path of mechanics	 HEAD MASTER Z P H SCHOOL KANCHIKACHERLA-571111
Day - 5	Farm mechanization by Power tool.	Students were very interested in the path of mechanics	E. Krishna Kumari Panchayat Secretary GRAMA PANCHAYAT, KONDURU
Day - 6	Farm mechanization by Power tool.	Students were very interested in the path of mechanics	E. Krishna Kumari Panchayat Secretary GRAMA PANCHAYAT KONDURU

WEEKLY REPORT

WEEK - 6 (From Dt 16.11.23. to Dt 23.11.23)

Objective of the Activity Done:

Detailed Report:

on the detail discussion with the students on their carrier and the path they want to go in, we have successfully managed to make them learn about their importance of B.tech in their lives and in their path of getting a great opportunities the students were very inteqid in their path of carrier to make get a bright future we even gave everyone a clear information on the goals and ways to achive them even through they are studies.

CHAPTER-5

Outcomes Description

Every school we have visited for career guidance has given an exceptional outcome including the students of 10th (9th class). The interest they have shown in our guidance has given us more energy & commitment about the other schools and the rating of our guidances and their understanding towards.

Everyone of them were different from each other in the ideology with a better way of having a good career we have sharpened their ideas with explanation and shown them the opportunities that are in front of them.

We visit different forms one by one but we were excited and schooled seeing them gathering towards our explanation on the modern forming and usage of power tools.

CHAPTER-6

Recommendations and Conclusions

As many as schools we have visited we understood many things about the students and about their thought on career and future among them are.

- * lack of perspective
- * Lack of guidance on their goals
- * Having temporary goals
- * Thinking of earning money is what career means
- * Lack of knowledge on path of career

As we have guided them in the right direction to achieve their goals and we also shown the opportunities they have we hope achieve their goals and have a better career.

CHAPTER-7

Student Self-Evaluation for the Community Service Project

Student Name: P. Sai Kumar

Registration No: 211175A0352

Period of CSP: 4 weeks

Date of Evaluation: 30/01/2023

Please rate your performance in the following areas:

Rating Scale: Letter grade of CGPA calculation to be provided

1	Oral communication	1	2	3	4	5
2	Written communication	1	2	3	4	5
3	Proactiveness	1	2	3	4	5
4	Interaction ability with community	1	2	3	4	5
5	Positive Attitude	1	2	3	4	5
6	Self-confidence	1	2	3	4	5
7	Ability to learn	1	2	3	4	5
8	Work Plan and organization	1	2	3	4	5
9	Professionalism	1	2	3	4	5
10	Creativity	1	2	3	4	5
11	Quality of work done	1	2	3	4	5
12	Time Management	1	2	3	4	5
13	Understanding the Community	1	2	3	4	5
14	Achievement of Desired Outcomes	1	2	3	4	5

HOME ENERGYAUDIT - WORKSHEET

OBJECTIVES:

- To estimate Energy consumption for a house;
- To understand peak energy consumption pattern;
- To identify ways and means of Energy Conservation;
- To propose action plan for Energy Conservation;
- To measure the savings after implementation of Energy conservation tips.

INTRODUCTION:

Energy is an important commodity in this modern era. As the utility of energy is continuously increasing due to reasons like population growth, increase in usage of electrical equipment, mechanization, enhancement in comfort living requirements etc., The Energy production is not increasing to meet such peak increase in usage of Energy. It is leading to huge gap between Energy Demand and Supply. Hence it is every citizens responsibility to reduce the gap between energy demand and supply by conserving energy as much as possible. In order to implement energy conservation it is necessary to understand the consumption patterns and possible avenues of conservation. Energy Audit is one best way to achieve this.

An energy audit is a way to calculate how much energy being used at home. It will help the citizen to identify how much energy each home uses and where could be saving energy possible. It is the first step to making the home, the school or any other area more energy efficient.

Activity 1: Calculate the Amps and energy used by all of these appliances in one day.

Equation for calculating energy:

- Energy(kWh) = (Power(watts) x time x number of appliances) ÷ 1000

Appliance	Power(W)	Number of appliances	Time used (hour)	Energy(kWh)
Ceiling Fan	80W	2	5	$(80 \times 5 \times 2) \div 1000 = 0.8 \text{ kWh}$
Desktop computer	300W	1	4	$(300 \times 4 \times 1) \div 1000 = 1.2 \text{ kWh}$
LED bulb	10W	4	3	$(10 \times 3 \times 4) \div 1000 = 0.12 \text{ kWh}$
Tube light	40W	4	5	$(40 \times 5 \times 4) \div 1000 = 0.8 \text{ kWh}$
Television	200W	1	4	$(200 \times 4 \times 1) \div 1000 = 0.8 \text{ kWh}$
Washing Machine	320W	1	3	$(320 \times 3 \times 1) \div 1000 = 0.96 \text{ kWh}$
Microwave	1400W	1	2	$(1400 \times 2 \times 1) \div 1000 = 2.8 \text{ kWh}$
Refrigerator	2000W	1	24	$(2000 \times 24 \times 1) \div 1000 = 48 \text{ kWh}$
Immersion Water Heater	1000W	1	0.5	$(1000 \times 0.5 \times 1) \div 1000 = 0.5 \text{ kWh}$
Geyser	3000W	1	3	$(3000 \times 3 \times 1) \div 1000 = 9 \text{ kWh}$

Activity 2: Questions

1. Which were the three appliances that used the most energy? What are they used for?

Washing machine, water heaters, lighting are the appliances that

are used the most Energy it's home appliances to make our daily life routine easier

2. a) What was the total energy used by all of the appliances (tip - add up all of the energy (kWh) values):

*Note-

It is likely that your energy usage may be higher than the calculated value as you may have other appliances that are not included in this table. This worksheet provides an approximate value.

$$\underline{1.2 + 0.12 + 0.8 + 0.8 + 0.96 + 2.8 + 48 + 0.5 + 9 = 64.18 \text{ kWh}}$$

b) Calculate how many kWh of energy are consumed on average in a month (tip - multiply

Total Energy used 2 days in month

$$64.18 \times 30 = 1925.4$$

c) Check your electricity bill and compare it to the monthly energy usage that you calculated.

Your total monthly energy usage from your calculation in 2(b)	1925.4
Your total monthly energy usage from electricity bill	2100

An average household in Mumbai city consumes 298 kWh of electricity every month and releases about 244 kg of CO₂e (1 kWh releases 0.82 kg CO₂e)

3. Write down ideas for reducing energy consumption for appliances in each category:

Device	Ideas to reduce energy
Example: Washing Machine	I could hand wash my clothes some days. Also, I could make sure my family runs bigger loads of washings so that we do not waste water.
Heating and cooling	Seal crevices & cracks, clean your AC filters, regularly, close the drapes, clean your AC filter regularly
Screen-based	Black on LED screen is known to use less power because the LEDs that make up each pixel are off, whereas displaying white means, the LEDs need to shine and consume power.
Lighting	**Did you know, switching off a device from the source at plug reduces consumption of electricity by an average of 10% Invest in energy-saving light, reduce your voltage, use dimmer switches. Keep the light clean.

4. Choose two ways that you will reduce your energy bill by 10.0%

Turn off lights, electronics, replace traditional light bulbs with LED's reduce appliance use. use hot water, get a smart thermostat ensure your home is properly insulated

CONDUCT SIMILAR STUDY AFTER IMPLEMENTING THE ENERGY CONSERVATION MEASURES AND MONITOR HOW MUCH IS THE SAVING.

5. Comparing electricity bills before and after your energy conservation efforts:

Before:	147.43
After one month:	100
Total money saved:	47.43

TOTAL ENERGY SAVINGS FOR THE WARD / VILLAGE AND ALSO REDUCTION IN CARBON EMISSIONS MAY BE CALCULATED AND SUBMITTED TO THE FACULTY MENTOR / WARD / VILLAGE SECRETARY.

THE SAME CAN BE SUBMITTED IN THE FORMAT OF COMMUNITY SERVICE PROJECT AT COLLEGE

BOARD FOR COMMUNITY DEVELOPMENT *through* EDUCATION

ELECTRICAL ENERGY - SAVING TIPS

(Source: BEE India)

LIGHTING SYSTEM

1. One of the best energy-saving devices in lighting is the switch. Turn off lights when not required.
2. Efficient Fluorescent tube lights such as T5, CFLs and LEDs are much more efficient than incandescent bulbs and can save about 60-80% of electricity for the same lighting levels.
3. Electronic ballasts can reduce power consumption by 20%.
4. Consider employing infrared sensors, motion sensors, automatic timers, dimmers and photocells switches wherever applicable for efficient use. Use outdoor lights with timers or photocells so that they turn off automatically in day light and avoid using curtains during the day.
5. Use task lighting, which focuses light where it is needed. A reading lamp, for example, lights only reading material rather than the whole room.
6. Dirty tube lights and bulbs deliver less light and can absorb about 50 percent of the light; dust tube lights and lamps regularly.
7. Look for BEE rating on the Tubular Fluorescent Lamps.
8. Use artificial lighting only when there is inadequate natural light in a space.
9. Don't replace tube lights (line source) which light over a larger linear spread with a bulb (point source) that emits light from a single point.
10. Don't use dark-colored surface in workrooms. These reduce the reflected light levels and increase the number of lamps required to illuminate the space.
11. Children are advised to study in one room and with individual table lamps and advise them to switch off the individual lamps when not required. Children to utilize morning hours & broad day light for studies rather than using artificial light.
12. Switch off alternate tube Lights/lamps in common areas and staircases during late hours in the night.
13. Please note, a 'Zero Watt' incandescent bulb uses about 10 to 15 watt while an LED bulb of 9 watt can provide light output equivalent to 60 watt incandescent bulb.

CEILING FAN

1. Replace conventional regulators with electronic regulators for ceiling fans.
2. Height of the fan relative to the ceiling. If fan is too close to the ceiling, the airflow is restricted; that is, the fan will not be able to draw as much air through its blade as it has the potential to do. For this reason, 'Hugger' style fans (those which mounted directly to the ceiling without the use of down rod) are all inherently disadvantaged. The distance that a fan should be mounted from the ceiling is directly correlated with its air moving potential; no fan should be mounted with its blade closer than 24 inches to the ceiling.
3. Pitch of the fan's blades. The angle at which the fan's blades tilted relative to X axis is referred to as the blade pitch. The steeper the pitch, the greater the air flow.
Since increased pitch also means increased drag, only fans with well-made motors can support steep pitches. Cheaply made fans typically have a pitch between 9 and 13 degrees.

AIR CONDITIONER

1. Use BEE star labeled products.
2. Use ceiling or table fan as first line of defense against summer heat. Ceiling fans, for instance, cost about 3 rupees an hour to operate – much less than air conditions (Rs.100 per hour).
3. One will use 3 to 5 per cent less energy for each degree air conditioner is set above 22°C (71.5°F), so far set the thermostat of room air conditioner at 25°C (77°F) to provide the most comfort at the least cost.
4. Reduce air-conditioning energy use by as much as 40 per cent by shading your home as windows and walls. Plant trees and shrubs, to keep the day's hottest sun off your house.
5. Using ceiling or room fans allows you to set the thermostat higher because the air movement will cool the

room.

6. A good air conditioner will cool and dehumidify a room in about 30 minutes, so use a timer and leave the unit off for some time.
7. Clean the air-conditioner filter every month. A dirty air filter reduces airflow and may damage the unit. Clean filters enable the unit to cool down quickly and use less energy.
8. Have your air conditioning unit checked every 6 months. If the Freon level is not correct, you will waste a lot of energy and your home will never be as cool as you want it.
9. The gaps around the windows and doors leads to A C loss. You can use a candle to look for drafts. If the flame flickers or dances, found the place to seal.
10. Draperies on windows help reduce energy loss.
11. Use electronic devices with occupancy sensors which switch on or off automatically by sensing if the room is occupied.
12. Switch to evaporative coolers from air conditioners during hot/dry summer months.
13. Buy split ACs instead of window ACs. They cost more, but they are more energy efficient and consume lesser electricity.
14. Do not install AC units on the west and south walls as these are exposed to direct sunlight through a major part of the day during summers.
15. Do not apply dark colors on the external surfaces (roof and walls) of the house. Dark colors absorb more heat than light colors, leading to increased use of the AC.
16. Ensure that the condenser of the unit must have enough space around it for air to circulate and help the refrigerant dissipate its heat easily.

REFRIGERATOR

1. Use BEE star labelled products.
2. Keep your refrigerator and freezer at the right temperature. If they are only 2-3 degrees colder than necessary, energy consumption may go up by approx 25%.
3. Make sure the door is sealed tightly. When it's dark, place a lit flashlight inside the refrigerator and close the door. If light around the door is seen, the seals need to be replaced.
4. Make sure that the refrigerator is not place against outside facing wall or walls exposed to the direct sunlight.
5. Refrigerator motors and compressors generate heat, so allow enough space for continuous airflow around refrigerator. If the heat can't escape, the refrigerator's cooling system will work harder and use more energy.
6. Do no put uncovered liquids in the refrigerator. The liquids give off vapors that add to the compressor workload.
7. Allow hot food to cool off before putting it in the refrigerator.
8. Think about what you need before opening refrigerator door. You'll reduce the amount of time the door remains open.
9. Make sure that refrigerator's rubber door seals are clean and tight. They should hold a slip of paper snugly. If paper slips out easily, replace the door seals.
10. When dust builds up on refrigerator's condenser coils, the motor works harder and uses more electricity. Clean the coils regularly to make sure that air can circulate freely.
11. Defrost freezer compartment regularly for a manual defrost refrigerator.
12. Make sure that you are using a refrigerator that is approximately sized for your needs. If your fridge is too small, you may be overworking. If it is too large, then you are potentially wasting energy and home space.

OVENS / MICROWAVE OVEN

1. Microwaves use around 50% less energy than conventional ovens: they are most efficient for small portions or defrosting.
2. Check the seal on your oven door to see if there are cracks or tears in it.
3. Develop the habit of 'lids-on' cooking to permit lower temperature settings.
4. Carefully measure water used for cooking to avoid having to heat more than is needed.
5. Begin cooking on highest heat until liquid begins to boil. Then lower the heat control settings and allow food to simmer until fully cooked.

6. Rearrange oven shelves before turning your oven on and don't peep at food in the oven! Every time you open the oven door, 4°-5° is lost
7. When preheating an oven for baking, time the preheat period carefully. Five to eight minutes should be sufficient.
8. For large items, stove-top cooking is most efficient, especially with gas.
9. For large items, stove-top cooking is most efficient, especially with gas.

WASHING MACHINES

1. Washing machines can account for as much as 20% of the electricity you use.
2. Use Cold water, as almost 90% of the energy consumed by washing machines goes to heating the water. Set the washing machine temperature to cold or warm and the rinse temperature to cold as often as possible.
3. Each was cycle uses up to 60 to 90 liters of water. Use washing machine on full load and plan washing periodicity to save on water too.
4. Adding too much detergent actually hampers effective washing action and may require more energy in the form of extra rinses.
5. Wash only full loads of clothing-but do not overload machine. Sort laundry and schedule washes so that a complete job can be done with a few cycles of the machine carrying its full capacity, rather than a greater number of cycle with light loads.
6. Soak or pre-wash the cloths for effective cleaning.

COOKING

1. Organized cooking activity can save about 20% Energy.
2. Use right quantity of water required for cooking and reduce gas / kerosene usage by 65%.
3. Cook on low flame as far as possible and save 6 to 10% energy.
4. The pressure cooker should be loaded 2/3rd of the foodstuff is solid & hard and $\frac{1}{2}$ if loaded with liquid. Properly used pressure cookers can save up to 50 to 75% of energy as well as time.
5. Cook your food in solar cooker and save cost of 2 LPG Cylinders annually.
6. When cooking on a gas burner, use moderate flame settings to conserve LPG.
7. Remember that a blue flame means your gas stove is operating efficiently.
8. Yellowish flame is an indicator at the burner need cleaning.
9. Use pressure cooker as much as possible.
10. Use lids to cover the pans while cooking.
11. Bring items taken out of refrigerators (like vegetables, milk etc) to room temperature before placing on the gas stove for heating.

GEYSER / WATER HEATER

1. Install Solar Water Heating System.
2. By reducing the temperature setting of water heater from 60 degrees to 50 degrees C, one could save over 18 percent of the energy used at the higher setting.
3. To help reduce heat loss, always insulate hot water pipes, especially where they run through unheated areas. Never insulate plastic pipes.
4. A dripping faucet wastes water and if it's dripping hot water, its wasting energy too. Often requiring nothing more then a new washer, fixing leaks is one of the quickest and least expensive ways of reducing the energy and water bills.
5. Another way to reduce waste is to take showers or baths depending on which uses less hot water then baths, other way baths use more. They are both right. Which is correct for you depends on how long and hot your showers are and how deep deep and warm your baths are.
6. Using less hot water may be easier than you think. Water conserving shower heads and faucet aerators can cut hot water use inn half.. To see if this will work for you, first determine what your faucet and shower flow rates are now.
7. To select the right water heater for your home, you need to consider family size and whether your usage would be considered high or low demand. It is assumed that you know your family size, so all you have to determine is your usage profile.

COMPUTER

1. Computer that runs 24 hours a day, for instance, used more power than an energy efficient refrigerator.
2. Screen savers save computer screens, not energy. Start-ups and shutdown do not use any extra energy, nor are they hard on your computer components. In fact, shutting computers down when you are finished using them actually reduces system wear and saves energy.
3. Purchase flat-screen LCD monitors.
4. Setting computers, monitors and copiers to sleep-mode when not in use helps cut energy costs by approximately 40%
5. Activate and standardize 'power down' on new and existing PCs
6. If your computer must be left on, turn off the monitor; this device alone uses more than half the system's energy.
