ILMS Software Bills(2020-2021)

NewGenLib has an extensive list of parameters that a library can set before implementing the functional modules. These include a range of general set up parameters as well as module-specific parameters, e.g., the definition of a patron-item privileges matrix to define loan, renewal limits and overdue charges for various patron categories with respect to different item types.

Different Features in ILMS:

ACQUISITIONS MANAGEMENT

NewGenLib supports different acquisition modes: acquisitions via requests from users, acquisitions via approval purchase; acquisitions via firm orders; and acquisitions via gifts. processing,

TECHNICAL PROCESSING AND DATABASE DEVELOPMENT

NewGenLib is fully compliant with the MARC-21 format for bibliographic records. It allows cataloguers the possibility to describe items at three levels of detail.

CIRCULATION CONTROL

NewGenLib provides all the functionality that is needed in circulation management in a typical library. In addition, however, NewGenLib allows elaborate configuration of privileges to different users in respect of different types of materials.

NewGenLib also allows reservation queues. These can be modified by authorized library staff when needed.

SERIALS MANAGEMENT

NewGenLib's serials management module is extremely comprehensive and has been crafted with great care to take care of the many complications in this area of library management.

REPORTS, QUERIES AND UTILITIES

NewGenLib provides the possibility to produce many predefined module- specific reports. These reports are management information reports and help the library management to take meaningful decisions

ONLINE PUBLIC ACCESS CATALOGUE (OPAC)

NewGenLib's OPAC, like all contemporary ones is fully Browser based.

MICT LIBRARY OPAC FACILITY FOR RESOURCE DATABASE

The Online Public Access Catalog (OPAC) is a computerized database containing information about materials available in a library's collection. Accessible from terminals within the library, on-campus terminals, or remotely via the internet, OPAC provides users with the ability to search and retrieve comprehensive bibliographic information for the library's holdings.

Users can efficiently locate documents by conducting searches using various parameters such as author's name, subject, keywords, or title. This user-friendly interface enables patrons to determine the availability of specific items, including books, CDs, or journals. Additionally, OPAC serves as a tool for users to regularly check their account status, and it facilitates the suggestion of new books for library procurement through personalized login accounts.

Whether accessing the system within the library premises or remotely, OPAC enhances the efficiency of information retrieval and empowers users to interact with the library's resources in a seamless and convenient manner.

MICT CENTRAL LIBRARY AND INFORMATION CENTER

Usage Report(2020-2021)

During the 2020-21 Academic year, the library recorded an average of 93 daily walk-ins on working days. However, owing to the challenges posed by the Corona Pandemic, we were able to calculate this average based on the data available for only four months, from January 2021 to April 2021. The library employs a state-of-the-art biometric login system to manage user access efficiently. This cutting-edge technology ensures a secure and streamlined entry process for all library patrons.

The comprehensive data collected through the biometric login system is systematically stored and organized, forming the basis for a detailed monthly report. This report serves as a crucial tool for statistical analysis, allowing library administrators to gain a deep understanding of user trends, peak usage times, and popular resources.

By leveraging this data-driven approach, the library can make informed decisions to optimize resource allocation, improve user experience, and enhance overall operational efficiency.

Statistical analysis of per day usage of the Library by Faculty and Students (2020-2021):

During the 2020-21 academic years, the library recorded an average of 93 daily walk-ins on working days. However, owing to the challenges posed by the Corona Pandemic, we were able to calculate this average based on the data available for only four months, from January 2021 to April 2021.
